Have Ss underline words/phrases related to green living: awareness, refill, reusable, ecotour, decompose Put Ss in pairs and ask them to compare the words and phrases they have underlined and discuss their meaning. Then check comprehension as a class. Call on two or three pairs of Ss to read the conversation aloud. In stronger classes, teacher asks Ss to close their books and just listen to the conversation once. Teacher asks some comprehension questions to check understanding. Then have them open their books and listen again, this time following the text and checking if their answers were correct. 	- Students look at the picture and answer the questions Students listen to the recording Students underline words/phrases related to green living Students compare the words and phrases with their partners Students read the conversation aloud. Suggested answers:

- I/We suggest donating second-hand books to charity or schools and local libraries instead of throwing them away. Cardboard boxes around the house could be used to store things, or turned into useful objects such as decorations, pencil cases or pen stands. These simple ways can help us save trees by reusing used paper products, rather than throwing them away after a single use.

III. PROCEDURES

1. WARM-UP (5 mins)

a. Objectives:

- To stir up the atmosphere and activate students' knowledge on the topic;
- To enhance students' skills of cooperating with teammates.

b. Content:

- Game: Who says it?

c. Expected outcomes:

- Students can get knowledge about how harmful our festival traditions are.

incorrect, the chance is transferred to the		
other team.		
- The team with the higher score is the		
winner.		

- Teacher observes the groups and gives feedback.

2. ACTIVITY 1: EVERYDAY ENGLISH (20 mins)

a. Objectives:

- To provide a model conversation in which speakers make predictions.
- To review expressions for making predictions.
- To help Ss practise making predictions.

b. Content:

- Task 1: Listen and complete the conversations with the expressions in the box. Then practise them in pairs (p.40)
- Task 2: Work in pairs. Use the models in Task 1 to make similar conversations for these situations. One of you is A, the other is B. (p.40)

c. Expected outcomes:

- Students can use appropriate language to make predictions.

Useful expressions (6 mins)				

- Teacher asks students to give some
expressions for making predictions.

Making predictions.

- it's hard to predict/say...

Task 2: Work in pairs. Use the models in Task 1 to make similar conversations for these situations. One of you is A, the other is B. (6 mins)

- Tell Ss that the words they used to fill in the gaps in Activity 1 are used to make predictions.
- Ask Ss to read the list of useful expressions and check understanding.
- Put Ss in pairs and explain the task: to role-play conversations similar to the one in Activity 1, but based on the two situations. Ss should play the roles given in this activity.
- Give Ss a few minutes to plan their conversations before they role-play them (e.g. who will be Student A, who will be Student B, and have them underline key words in the task question). Have them write down some prompts to help them. Encourage them to swap roles.
- Walk round the class and provide help when necessary.
- Ask some pairs to role-play their conversations in front of the whole class. Praise for good effort, clear pronunciation and fluent delivery.

- Make plans for the roleplay
- Practise the role-play conversation, based on the two situations.
- Swap the role and continue practising.
- Perform in front of class.

Sample answers:

1. A: I wonder if the Youth Union will accept our proposal to install automatic lights and sensor taps in our school. I really hope they will. B: It's really hard to say. I mean they are going to like the idea, but it's unlikely that they will install them around the school because it's going to cost a lot of money. I guess they may install them in the toilets first.

2.

B: I'm so excited about the Green Day event next week. Do you think many people will come?

A: I guess around 300 people will come to the event. That will include students, teachers and some parents.

B: That'll be great. What activity do you think will be most popular?

A: It's hard to say, but I think our game booth will attract a lot of people. Everyone loves playing games and winning eco-friendly prizes!

B: I agree. Do you think the event will make a huge impact?

A: Certainly! People are going to love the Green Day! I expect that as a result, many of the participants will adopt greener habits in the future.

e. Assessment

- Teacher checks students' answers as a whole class.
- Teacher observes and gives feedback.

3. ACTIVITY 2: CLIL (15 mins)

a. Objectives:

- To help Ss learn about the possible environmental damage caused by some cultural traditions around the world.
- To help Ss relate what they have learnt about some cultural traditions to real-life situations.

b. Content:

- Task 1. Read the following text. What are the environmental problems of each tradition as mentioned in the text? Put a tick where relevant. (p.41)
- Task 2. Work in pairs. Suggest some green solutions to replace one of the traditions. (p.41)

c. Expected outcomes:

- Students memorise the information, and relate what they have learnt about how damaging some cultural traditions are to the environment.

- Tell Ss that they are going to read		
about three famous festival traditions		
around the world. As they read, they		

should fill in the comparison table to show the negative impact of these traditions on the environment.

- Explain or elicit any new or difficult words, e.g. frames, wildfires, chemicals. In stronger class, encourage them to guess their meaning from context as they read the text.
- Have Ss read the text and complete the table individually.
- Check answers as a class.
- Go back to the questions on the board, i.e. the things Ss wanted to know about the topic. Ask which of the questions they can answer now and cross them out. Assign the rest for homework.

Task 2: Work in pairs. Suggest some green solutions to replace one of the traditions. (5 mins)

- Put Ss in pairs. Have each pair choose one of the traditions and discuss how they will make it more eco-friendly and reduce its impact on the environment.
- Ask some pairs to share their answers with the class.
- Students work in pairs to discuss.
- Students share their ideas in front of class.

Suggested answers:

- Instead of releasing balloons and sky lanterns, people can fly kites. Kites are made from materials that are not easy to break and can be used many times without creating pollution. Kite flying is a sustainable activity that uses a green power source – the wind. - There are many eco-friendly alternatives to fireworks. For example, a firework display can be replaced with a high-tech laser light show. Laser lights do not have a lasting impact on the environment. Another option is a drone display, which is also safe and more environmentally friendly. Drones do not release any harmful chemicals into the atmosphere and generate very little noise pollution. - We can buy a real Christmas

a. Objectives:

- To help Ss review the pronunciation of the diphthongs /1ə/, /eə/ and /ʊə/.
- To help Ss revise words they have learnt in this unit.
- To help Ss review the use of prepositions and relative clauses referring to a whole sentence.

b. Content:

- Pronunciation: Read the words and choose the odd one out. Then listen and check. (p.42)
- Vocabulary: Solve the crossword with the words you've learnt in this unit. What is the hidden word? (p.42)
- Grammar: Circle the mistake in each sentence. Then correct it. (p.42)

the words.			

Vocabulary: Solve the crossword with the words you've learnt in this unit. What is the hidden word? (4 mins)

- Ask Ss to work in pairs to solve the crossword. Remind them that all the words they need are in this unit, and there is a hidden vertical word.
- Have Ss complete the activity.
- Check answers as a class.
- If time allows, ask them to find the texts where these words first appear in the unit and call out the section, e.g. packaging first appears in the Language section.
- Ss work in pairs
- Ss solve the crossword.

Answer key:

Grammar: Circle the mistake in each sentence. Then correct it. (4 mins)

- Ask Ss to read the sentences, focusing on the underlined words.
- Encourage them to pay attention to the words before and after the underlined parts and decide if the phrases are grammatically correct, e.g. 1. Answer choice A. 'to' is part of the phrase 'learn to recycling', which is incorrect. We say 'learn to do sth' or 'learn about sth', not 'learn to doing sth'. So A is the mistake.
- In weaker classes, remind them that the focus today is on verbs with prepositions and relative clauses referring to a whole sentence. Ask them to review the grammar explanations and examples in the Language section before they complete the activity.
- Check answers as a class by asking individual Ss to identify the mistakes, correct them and provide reasons for their corrections.

- Ss identify the incorrect part, give corrections and reasons for their corrections.

Answer key:

- 1. A (to \rightarrow about)
- 2. B (that \rightarrow which)
- 3. C (with \rightarrow to)
- 4. B (over \rightarrow away)

e. Assessment

- Teacher obverses Ss's work and gives feedback.

3. ACTIVITY 2: PROJECT (28 mins)

a. Objectives:

- To provide an opportunity for Ss to develop their research and collaboration skills, and to practise writing a leaflet.

b. Content:

- Eco-friendly habits
- c. Expected outcomes:

- Students practice giving a presentation.
