Active and passive causatives

• The active causative is used when the subject causes the object to do something. The pattern means 'to cause someone to do something'.

have + someone + bare infinitive get + someone + to-infinitive

Example: The AI expert had his assistant activate the new robot. I will get more people to join the technology club.

• The passive causative is used when the thing is done for the subject by someone else. The pattern means 'to cause something to be done'.

have/get + something + past participle

Example: The AI expert had/got the new robot activated.
