Then they come up with some ideas about how robots and AI will be in the future (<i>AI will replace tedious or dangerous tasks, AI will treat, and largely eliminate, neurological disorders like Alzheimer's, Parkinson's, most birth defects, and spinal cord injuries as well as blindness and deafness, robots will be controlled by our minds</i>)- Invite some groups to present a summary of their discussion to the class.	<ul style="list-style-type: none">- Students work in groups to discuss the question.- Students share their ideas in front of class.	<p>Suggested answers:</p> <p>Artificial intelligence (AI) and machine learning (ML) have become more popular in Vietnam with a large proportion of young people having experimented in these fields after realizing their potential. There are three commonly used AI types – face recognition, voice recognition and image analysis. In the future, AI will replace tedious or dangerous tasks. It also will treat, and largely eliminate, neurological disorders like Alzheimer's, Parkinson's, most birth defects, and spinal cord injuries as well as blindness and deafness.
